

## AWC LGD Hierarchy Mapping

This process can be done only through CDPO level. It is requested to accurately map the AWCs since this is the FINAL stage of AWC LGD Mapping after which the hierarchy will be frozen. This has been developed as it was observed that same LGD Code was used multiple times more than its desired limit.

### Process to do AWC LGD Hierarchy Mapping:

#### AWC Belongs to:

1. Please check whether AWC Belongs to Rural or Urban.
2. Those AWCs which belong to Tribal area, click on **Edit** against the AWC. From the “**AWC Belongs to**” dropdown, select **Tribal Urban** or **Tribal Rural**.

The screenshot shows a web application interface for 'Administrative Mapping'. The form includes fields for State (West Bengal), District (Kalimpong), Project (Gorubathan), Sector (Dalim), Village/Town/City (VILLAGE), Full Address (P.O-Fagu, Pincode-735231), and Latitude (00.00000000). A dropdown menu for 'AWC Belongs to' is open, showing options: Urban, Select AWC Belong, Rural, Urban, Tribal Rural, and Tribal Urban. The 'Urban' option is currently selected. The form also has 'Cancel' and 'Save' buttons at the bottom right.

3. Save the page.

The first section of Mapping shows details of the AWC as mapped in Poshan Tracker. To align the same with LGD, the second section is provided. In **AWC Geographical Mapping**, AWC Belongs To, State Name, District Name are already shown by default and frozen.
